

CLAIMS

1. A resin composition, characterized by containing a laminated film, having at least a metal layer made of antibacterial metal and synthetic resin films that cover the two sides of the metal layer, and a synthetic resin.

2. The resin composition according to Claim 1, characterized in that said antibacterial metal is silver.

3. The resin composition according to Claim 1 or 2, characterized in that the form of said laminated film is any of a powder particle form, a thread form and a strip form.

4. The resin composition according to any of Claims 1 to 3, wherein the elution of silver ions cannot be prevented, and antibacterial activity is not lost even when the metal layer of the laminated film is completely buried in the synthetic resin.

5. The resin composition according to any of Claims 1 to 4, wherein a spark phenomenon due to radio waves does not occur even when the elution of silver ions is not prevented in the resin composition.

6. The resin composition according to any of Claims 1

to 5, characterized in that the melting point and the softening point of the synthetic resin that forms the resin composition are lower than the melting point and the softening point of the synthetic resin films that form a laminated film which is included in the resin composition, and thereby, the resin composition has an aesthetic appearance with excellent metal gloss.

7. A piece of furniture or an electrical home appliance, characterized in that at least a portion of the external surface is coated with the resin composition according to any of Claims 1 to 6.

8. A molded object formed by molding the resin composition according to any of Claims 1 to 6.
